

## TechTip G4 – Maintaining Pressure and Ratio

Plural component spray equipment frequently arrives from the factory with size 80 or 60 mesh pump and gun screens. While this works fine with SPF applications, the screen mesh size may be too small for many plural component coating applications.

Fillers typically used in coatings can clog small mesh screens, leading to off-pressure and/or off-ratio conditions. If you are experiencing difficulties maintaining equal pressures and/or staying on-ratio when applying plural component coatings, try using a larger mesh screen.

### ABOUT THE SPRAY POLYURETHANE FOAM ALLIANCE (SPFA)

Founded in 1987, the Spray Polyurethane Foam Alliance (SPFA) is the voice, educational and technical resource, for the spray polyurethane foam industry. A 501(c)6 trade association, the alliance is composed of contractors; manufacturers and distributors of polyurethane foam, related equipment and protective coatings; and consultants who provide inspections and other services. The organization supports the best practices and the growth of the industry through several core initiatives, which include educational programs and events, the SPFA Professional Installer Certification Program, technical literature and guidelines, legislative advocacy, research, and networking opportunities. For more information, please use the contact information and links provided in this document. [www.sprayfoam.org](http://www.sprayfoam.org)
