

2024 Mobile Spray Rig Price List

High Performance Spray Rigs From the SPF Industry's Leading Provider of Mobile Spray Rigs, Training, Certification and Business Support

**Make the Right Choice
for Your Business**

****Prices effective January 1st, 2024****

www.profoam.com • (706) 557-1400

Profoam offers a complete line of mobile spray rigs for plural component applications such as sprayfoam insulation, sprayfoam roofing, polyurea coatings, Geotech lifting and other. All Profoam rigs are custom designed and built to ensure the needs of our customers are met. One size does not fit all w/ plural component equipment and spray rigs. Our knowledgeable staff can consult w/ you and recommend the right mobile spray rig to fit your specific application need. Profoam rigs are built to last and built to our customers specifications. This rig book showcases many of our most common spray rig designs and gives you upgrade options to choose from. We also have a handful of used rigs available as well.

Why Choose a Profoam Pro Series Mobile Spray Rig? Our Standard Features are Our Competitors Upgrades!

- » 12" OC Floor Supports – Standard
- » 24" ATP Rock Guard Surround – Standard
- » 16" Radial Star Mag Wheels and Tires – Standard
- » 7,000-lb Dexter Torflex Torsion Axles (14,000GVW) – Standard
- » 14 Ply Radial Tires – Standard
- » 8,000-lb Heavy-Duty Hydraulic Electric Jack – Standard
- » Fully Adhered Rubber ATP Flooring - Standard
- » 1-3/4" Closed Cell Foam Insulation Envelope – Standard
- » 3/4" Cabinet Grade Painted Plywood Walls – Standard
- » Pour Off and Recirculation System – Standard
- » Rotary Screw Compressor - Standard
- » High Temperature Refrigerated Air Dryer – Standard
- » 5,000 BTU Infrared Electric Wall Heater – Standard
- » Metal EMT Conduit Wiring – Standard
- » 210' Heated Spray Hose – Standard
- » 27" Husky Industrial Tool Box/Work Bench w/ Bench Vise and Tool Package – Standard
- » 28" Husky Industrial Wall Cabinet - Standard
- » Allegro 1-Man Fresh Air Respirator System – Standard
- » Job Site Insulation Supply Package - Standard
- » Free Initial Field Training on Your Job Site – Standard

Common Spray Rig Types

- Bumper pull trailers (One, Two and Three Compartment)
- Gooseneck trailers (Two Compartment)
- Sprinter Vans
- Box trucks (One or Two Compartment)

Step 1: Choosing The Spray Rig Size

Mobile spray rigs for the SPF insulation industry are generally configured in bumper-pull trailers, gooseneck trailers, sprinter vans or commercial box trucks.

The type of application typically determines the size of spray rig chosen. For example, commercial insulation or roofing projects are generally larger than residential insulation projects and therefore require a larger trailer or box truck for additional material storage. It is common to spray 3 or more sets of foam per day in these types of applications.

Sprayfoam insulation projects normally require less than 3 sets of foam materials to be stored inside of the mobile spray rig. It is uncommon to spray more than 2 sets of product in a single day due to tighter workspaces and less trigger time while maneuvering from room to room or through attics and crawlspaces.

Step 2: Choosing The Spray Rig Power Source

Shore Power Rig:

Profoam mobile spray rigs can be powered by a heavy-duty electrical cable with lengths up to 250' and sized according to the required power consumption of electrical components in the rig. This configuration is referred to as a "shore power" system and requires the least amount of vehicle space thus allowing for use of smaller units. The shore power cable is connected to the job site power source through a 100 Amp @ 240 Volt double pole breaker.

Diesel Powered Generator:

Profoam mobile spray rigs can also be powered by generators making them completely "self contained." The ultimate mobile spray rig design would feature a diesel engine generator for long term dependable power supply.

Diesel powered generators sized between 21-60 kW, are permanently mounted inside of the spray rig and can be operated in single or three-phase power.

Single-phase units have the flexibility to add a transfer switch and shore power cable allowing you to operate either the equipment off the generator or the job site power supply. Three phase mobile spray rigs allow for smaller generator units and are considered better for the electric motors over a long period of time.

Diesel generator units require significantly more floor space than gas or shore powered units. The average diesel powered spray rig is 18-20' in length.

Gas Powered Generator:

Some sprayfoam proportioners draw low enough amperage to enable a gasoline engine generator to power them. These generators typically deliver between 18-22 Kilowatts (kW) of power and can be configured on rolling chassis or industrial slides.

WINCO[®]

The rolling chassis units are secured to the trailer for travel which can be unharnessed and rolled off of the mobile spray rig for operation on the job site. The industrial slide units are configured to slide out of the side of the mobile spray rig while staying permanently attached to the vehicle. This allows the gas powered engine to get maximum airflow while in use, exhaust fumes to be outside of the workspace and reduced noise for the interior of the spray rig.

Gas generator powered spray rigs require slightly more floor space than shore powered rigs and therefore a larger spray rig is typically required. The average gas generator powered spray rig is 16-18' in length.

Step 3: Choosing The Proper Size Air Compressor

Profoam rigs come standard with industrial grade rotary screw air compressors for our electric compressor units. Rotary screw compressors are built to last and outperform conventional reciprocating air compressors due to their 100% duty cycle and simplistic design. The larger the compressor, the more CFM of air it will produce. All SPF rigs require compressed air to drive the material transfer pumps and spray gun. 15 CFM of air can run these two components sufficiently. However, when adding additional pneumatic components, your sprayfoam rig will require additional CFM of air. For example:

Step 4: Choosing The Right Proportioning Equipment

Profoam offers SPF and coating equipment from the two largest and best SPF equipment manufacturers (PMC and Graco) to help ensure our customers get the best value for their money. We will never force feed one specific product to our customers but rather act as a consultant to make sure our customers have all of the information needed to make an informed decision.

Both of these SPF equipment manufacturers make excellent products with great warranties. The choice comes down to application needs such as machine output, machine pressure, heating capability and hose length.

Machine Output:

The smallest machines used in mobile spray rig applications produce around 20 lbs/min output of material. This is plenty of output for residential and light commercial applications. Most spray guns for residential and light commercial applications are set up with mixing chambers that have material outputs in the 10-12 lbs/min range. It is difficult to control the installation of SPF in stud wall cavities once you exceed this volume.

Precision is important to achieve a consistent foam thickness, minimize waste and create a professional looking finished product. Mid-size machines have an output of around 30 lbs/min and are capable of installing residential or commercial insulation applications as well as small roofing applications. This size machine allows for larger mixing chambers in the gun for faster application of product in larger structures.

Our largest machines are capable of producing outputs between 40-55 lbs/min, which will enable you to spray any type of structure efficiently. These machines are ideal for large roofing applications, trench breaker applications, and other large volume projects. Keep in mind, even the largest machines we offer are capable of spraying small residential jobs as they can be governed by a smaller material mixing chamber and spray tip. The actual output of the product is determined by the size of the mixing chamber in the gun at the time of application and not by the overall output of the machine itself.

Machine Pressure:

Low-pressure proportioners are rated for spray pressures up to 2,000 psi, which is more than adequate for SPF insulation and roofing applications. Profoam materials are typically processed between 1,000 – 1,300 psi. High-pressure proportioners are rated for spray pressures up to 3,500 psi, which is sometimes required for plural component coatings such as polyurea. Contractors may choose to purchase a high-pressure machine that will give them the ability to spray both foam insulation and polyurea coatings.

Heating Capability:

SPF materials are generally processed between 120-140 degree temperatures at the gun. Drum storage temperatures between 60-80 degrees F are crucial to proper processing of SPF materials. At the machine, the primary heaters will preheat the material to the desired set temperature.

From there, the hose heater will help maintain the desired temperature all of the way to the spray gun. When choosing the type and size of heaters for your proportioning equipment, the product type and local climate are the two most important factors. Winter time applications in cold climates require greater heat capability to maintain a proper material temperature at the spray gun.

There are several heater sizes to choose from on our equipment and the equipment price generally increases along with the size of heaters chosen. The size of the heater will also directly impact the amount of electrical power required to run the equipment. The larger the heater, the more power required.

Hose Length Capabilities:

Profoam mobile spray rigs are offered with hose lengths up to 410'. Our standard insulation rigs come with an average of 210' of heated hose while our standard roofing rigs come with an average of 310' of heated hose. Hoses come in 50' sections and we always add a 10' whip hose at the end of the hose length.

The whip hose is intentionally shorter because it takes the most abuse and will wear out the fastest. When it comes time to replace it, you'll save hundreds of dollars over replacing a 50' section of hose. The desired hose length will be a determining factor on the machine choice because each machine has a maximum hose length restriction. For example, a Graco E-20 is limited to a maximum hose length of 210', a Graco E-30 is limited to a maximum hose length of 310' and most PMC machines will run up to 410' of spray hose with a 120 Volt hose heat transformer.

Step 5: Choosing The Correct Spray Foam Application Gun

Air Purge Guns:

Air purge spray guns are the most popular choice for SPF contractors. They are referred to as “air purge” because a steady stream of air flows through the mixing chamber and spray tip once the trigger is released to purge any residual material from the inside passages in the gun. Both Graco and PMC make great air purge spray guns and Profoam offers training, service and spare parts to support both products.

Mechanical Purge Guns:

Mechanical purge spray/pour guns are the best choice for concrete lifting and fan spray stud bay applications. The valving rod/mixing module design is better suited for these types of applications and Profoam offers

Step 6: Choosing The Correct Material Transfer Pumps

Material transfer pumps, also known as drum pumps or stick pumps, are used to transfer SPF material from the bottom of the 55 gallon drum to the foam proportioner. These pumps are typically pneumatic driven and come in 1:1, 2:1 and 3:1 ratios. We typically set these up to deliver 200 psi of fluid pressure to the proportioner.

Step 7: Choosing The Profoam Mobile Spray Rig Model

Profoam mobile spray rigs are offered in two different models, our standard Pro-Series and our new Economy (Eco) Series. Our Pro-Series rigs feature multiple upgrades throughout that are very beneficial to our customers. These special features have become standard on our mobile spray rigs over the years due to their performance based impact for our customers. Our Eco-Series come with the same great equipment packages as the Pro-Series rigs. The Eco-Series rigs are simply built with cost saving elements to help customers enter into the SPF industry for a smaller upfront investment.

What are the Differences Between Eco Series and Pro Series Spray Rigs?

Eco (Economy) Series Profoam Mobile Spray Rigs Come w/ the Same Great Equipment Packages as the Pro Series Rigs. The Eco Series Rigs are Simply Built w/ Cost Saving Elements to Help Customers Enter into the Sprayfoam Industry for a Smaller Upfront Investment. Here are a Few of the Differences:

- » Eco Series Rigs come w/ a 3,500-lb Trailer Jack Standard Instead of an Electric/ Hydraulic Jack
- » Eco Series Rigs come w/ Steel Wheels Instead of Aluminum Radial Star Mag Wheels
- » Eco Series Trailers do not come Standard w/ 24" ATP Rock Guard on all Exterior Surfaces
- » Eco Series Rigs do not come Standard w/ Insulation
- » Eco Series Rigs do not come Standard w/ Plywood Ceilings
- » Eco Series Rigs do not come Standard w/ Painted Walls
- » Eco Series Rigs come Standard w/ 160' of Spray Hose Instead of 210'

QUOTATION #:

**THIS QUOTATION IS VALID FOR 30 DAYS
UNLESS OTHERWISE SPECIFIED**

Trailer Package:

- » (1) 16' V-Nose Cargo Trailer: Semi Screwless Exterior, Dual 7,000-lb Dexter Torflex Torsion Axles w/ Electric Brakes (14,000 GVW), 16" Steel Wheels w/ 14 Ply Radial Tires, Full Size Spare, Rear 16" Boggy Wheels, 8' Wide x 7'6" Interior Height, LED Lights
- » Your Choice of Color
- » Ramp Door in Rear
- » (1) 3,500-lb Trailer Jack
- » (1) 36" Side Door w/ Flush and Bar Lock and Easy Access Step Well
- » E-Track Barrel Bracing System w/ Heavy-Duty Adjustable Ratchet Straps
- » Fully Adheared Rubber ATP Diamond Plated Flooring
- » 3/4" Plywood Walls
- » (1) 27" Husky Industrial Grade Tool Box/Work Bench w/ Job Site Tool Package and Bench Vise
- » (1) 12"x12" Hose Hatch
- » (1) 5,000 BTU Infrared Electric Wall Heater

Equipment Package:

- » (1) PMC PH-2 Horizontal/Electrical Proportioner: 28-lbs/min Output, 2,000 psi Max Working Pressure, 240V 1-Phase w/ 7,500-Watt Primary Heaters, 90V Hose Heater Transformer
- » 160' Heated Spray Hose w/ Scuff Jacket and Temperature Control Wiring
- » (1) Custom Profoam Hose Rack System
- » (2) Graco T3 Pneumatic 3:1 Material Transfer Pumps w/ 3/4" Moisture Lock Material Supply Hoses and 1/4" High Pressure Moisture Lock Material Recirculation Hoses
- » (1) Wall Mount Pour Over and Bleed Off System
- » (1) PMC Xtreme Air Purge Spray Gun w/ Tool Package
- » (1) Profoam Xtreme Gun Spare Parts Kit

Air Compressor Package:

- » (1) Rolair Gas Powered Belt Drive Air Compressor, 9 gallon Twin Air Storage Tanks, 23 CFM @ 125 psi, 270cc 9 hp Honda 4 Cycle Engine and Heavy-Duty Two Stage Cast Iron Twin Cylinder Pump
- » (1) 25 CFM High Inlet Temperature Refrigerated Air Dryer
- » Airnet Aluminum Air Line System

Electrical Package:

- » (1) 18kW Heavy-Duty Gas Powered Generator, Extra Large 15 gallon Fuel Tank, Electric Start, Heavy Duty Rubber Wheels
- » (1) 100 AMP 1-Phase Electrical Panel w/ Miscellaneous Breakers
- » Industrial Grade Electrical Wiring System
- » 50' #6/4 SO Power Cable w/ 60 AMP Breaker
- » Exterior 110V Shore Power Plugs for Trailer Lights
- » Multiple 110V Convenience Receptacles Throughout
- » (2) 4' LED Ceiling Lights

Safety Package:

- » (1) Allegro 9815-EF 1-Man Fresh Air Resporator System 150' 3/4" Air Hose
- » (1) Allegro Full-Face Mask w/ Peel Off Lens Covers
- » (2) North Full-Face Masks w/ Organic Vapor Cartridges w/ Peel-Off Lens Covers
- » (2) North Half-Masks w/ Organic Vapor Cartridges
- » (1) Case of 2XL Spray Suits
- » (12) Pairs of Spray Gloves
- » (1) Box of Latex Gloves
- » (1) Package of Head Socks
- » (1) 15 Minute Wall Mount Eye Wash Station
- » (1) Wall Mount First Aid Kit
- » (1) 5-lb Fire Extinguisher

Upgrade Options:

- » Delivery Available at **\$3.00** per Mile (1-way from Rutledge, GA)
- » Rooftop AC Unit w/ Heat Pump: **\$2,500**
- » Spare PMC Xtreme Spray Gun: **\$2,660**
- » Additional Hose Length: **\$2,394** per 50' Section
- » Pneumatic 55 gallon Drum Mixer w/ Aluminum Stand: **\$1,285**
- » Turbocutz Closed & Open Cell Wall Scrafig Tool: **\$2,325**
- » Vortec Beast Vacuum System: **\$10,885 + shipping**
(shipping NOT included - billed separately)
- » Drum Truck (55 gallon drums, 1000-lb Capacity): **\$575**
- » Big Foot 8,000-lb Electric/Hydraulic Trailer Jack: **\$850**
- » 28" Husky Industrial Grade Wall Cabinet: **\$300**

» Add Profoam Marketing Services Bundle: \$2,000

Includes:

- Rig Buy-Back Program
- 15% off all PMC, Graco, & Carlisle Parts & Equipment
- Customized Business Website Template
[domain & hosting fees (\$79/month) not included]
- Business Facebook Page Creation and Set Up
- Customized Advertising Videos
- Business Logo Design
- Business Cards
- Profoam Product Brochures
- FREE Access to SprayFoamLeads.com Database and Lead Alert System
- Print Subscription to Spray Foam Magazine
- Access to Purchase One of Our Premium Domain Names for YOUR Business (ex. ArizonaSprayFoam.com)

» Add Profoam Graphics Package: \$4,500

Includes:

- Design
- Printing
- Installation

» Add PMC PX-7 Pour Gun w/ Spare Parts Kit and Geotech Starter Kit: \$4,950

The PX-7 Gun is Ideal for Concrete Lifting Applications

Geotech Starter Kit Includes:

- [1] Profoam Concrete Injecting Ports Starter Kit
- [1] PX-7 Spare Parts Kit

All prices are guidelines and may not be valid for individual order/resale. If you see a rig you like and want a current formal price, contact Profoam at (706) 557-1400

Pictures may not be accurate based on any customer changes

**Equipment pictures may vary by manufacturer based on availability w/ the exception of items listed under "Equipment Package".*

Quote Includes:

- » All components necessary to install Profoam spray foam materials
- » Free initial field training on your job-site by one of our certified technicians
- » Free ongoing technical and sales support

Warranty: All components come w/ a one year manufacturer’s warranty unless otherwise stated or specified.

QUOTATION AMOUNT: \$72,900.00

SPECIAL NOTES:

<p><i>Terms Are 60% Upfront, Balance Due Prior to Leaving Profoam Location Please Sign and Return Upon Acceptance</i></p>	<p>APPROVAL SIGNATURE</p>	<p>DATE</p>
---	----------------------------------	--------------------

Thank you for the opportunity to earn your business!

Included in All Profoam Insulation Rigs:

- » (1) Gallon of Pump Lube
- » (1) Gallon of Gun Cleaner
- » (1) Squeeze Tube of Lubricant
- » (1) Case Brake Cleaner (12 – 14 oz Cans)
- » (1) 4 oz Bottle of 3:1 Air Tool Oil
- » (1) Case Door & Window Can Foam (12 – 24 oz Cans)
- » (1) Steel Can Foam Applicator Gun
- » (1) Can of Can Foam Gun Cleaner (1 – 12 oz Can)
- » (1) Can of Spray Release Agent (1 – 12 oz Can)
- » (1) Case of Acrylic Latex Caulk (12 – 10.1 oz Tubes)
- » (1) Steel Caulking Gun
- » (1) 4-n-1 Round Wire Pipe Cleaning Brushes
- » (1) Allen Wrench Set
- » (1) Set of Crescent Wrenches
- » (1) 12” Crescent Wrench
- » (1) Set of Miscellaneous Pliers
- » (1) Set of Miscellaneous Screw Drivers
- » (1) Set of Miscellaneous Cleaning Picks
- » (1) Set of Wire Cleaning Brushes
- » (1) 18” Pipe Wrench
- » (1) 14” Pipe Wrench
- » (2) Utility Knives w/ Blades
- » (1) 25’ Retractable Measuring Tape
- » (1) Arrow Pneumatic Staple Gun
- » (1) Tack Hammer Staple Gun
- » (1) Box of 3/8” Staples (5,000 qty)
- » (1) 25’ Coiled Air Hose
- » (1) Lug Wrench
- » (1) 600A AC Clamp Meter
- » (1) Digital Caliper
- » (1) Infrared Laser Thermometer
- » (1) Digital Moisture Meter
- » (1) Wall Mounted Latex Glove Holder
- » (1) Desiccant Cartridge and Adapter
- » (1) 100’ x ¼” Flexible Air Hose
- » (1) LED Work Light
- » (1) Box of 4 ml Plastic (10’ x 100’)
- » (1) Box of Rags
- » (1) Floor Scraper
- » (1) 32 gallon Trash Can
- » (1) Broom
- » (1) Large Dust Pan
- » (2) Curry Combs
- » (1) 36” Open Cell Foam Hand Saw
- » (1) Bung Wrench
- » (1) Blow Gun w/ Accessories
- » (1) Pack of Security Locks
- » (2) Extension Cords
- » (1) 24” x 72” Bakers Scaffold
- » (1) Roll of Teflon Tape

16' Pro Series PMC PH-2, 18kW Gas Generator Powered Spray Rig
