# HOW LOUD IS TOO LOUD?

## OSHA - Sets Legal Limits on Noise Exposure in the Workplace

### Typical Sound Levels (dBA)

- OTHER GUYS - 80
- OTHER GUYS - 79
- ★ FOREMAN - 70
- ★ PREMIER - 69

OSHA - Occupational Safety and Health Administration

Decibels are measured on a logarithmic scale which means that a small change in the number of decibels results in a huge change in the amount of noise and the potential damage to a person's hearing.
